# Missing information on usage #31

I am using this C# converter from html to pdf.

In the .csproj I have:

```
<ItemGroup>
<PackageReference Include="Codaxy.WkHtmlToPdf" Version="0.5.8" />
</ItemGroup>
```

I want to use in the controller something like:

```
PdfConvert.ConvertHtmlToPdf(new PdfDocument
{
    Url = "http://wkhtmltopdf.org/",
    HeaderLeft = "[title]",
    HeaderRight = "[date] [time]",
    FooterCenter = "Page [page] of [topage]"
}, new PdfOutput
{
    OutputFilePath = "wkhtmltopdf-page.pdf"
});
```

(this is the same code as in GitHub).

However, when I do (in the same controller):

using Codaxy.WkHtmlToPdf;

the project doesn't build (and shows error in the VS editor...). The error presented is:

Error CS0246 The type or namespace name 'Codaxy' could not be found (are you missing a using directive or an assembly reference?)

The GitHub page of the project lacks directions on using using directive....

Could you help me?

I am using VS2019 and .Net Core 2.1

Maybe Nuget installation failed. You can always manually copy this file into your project -

<https://github.com/codaxy/wkhtmltopdf/blob/master/NuGet/Codaxy.WkHtmlToPdf/content/PdfConvert.cs>
