

SuppressUnmanagedCodeSecurity or SuppressUnmanagedCodeSecurityAttribute?

Asked 8 years, 11 months ago Modified 8 years, 11 months ago Viewed 1k times

To disable security checks what should I set? `SuppressUnmanagedCodeSecurityAttribute` or `SuppressUnmanagedCodeSecurity` ?

1

Which of these versions is correct?

```
[DllImport("Native.dll"), SuppressUnmanagedCodeSecurity]  
public static extern void Method(...
```

or

```
[DllImport("Native.dll"), SuppressUnmanagedCodeSecurityAttribute]  
public static extern void Method(...
```

Both do the same thing. The class is named `SuppressUnmanagedCodeSecurityAttribute` , but when annotating attributes in general, you can omit the suffix `Attribute` .
