## How to configure Google Cloud Platform to your Ozeki VoIP SDK projects

### Step One:

Create a project in the [Google Cloud Platform Console](#):

- In the drop-down menu at the top, select 'Create a project'.
- Give your project a name.
- Make a note of the project ID, which might be different from the project name. The project ID is used in commands and in configuration.

Create your [billing details](#) at Google.

[Create credentials](#) for API access:

- Click 'Create credentials' and choose 'Service Account key'.
- Under 'Service account', choose 'Compute Engine default service account', and leave JSON selected under 'Key Type'. Click 'Create'. A .json file will be downloaded to your computer.
- Set the environment variable: 'GOOGLE\_APPLICATION\_CREDENTIALS' in PowerShell to the path of the JSON key that was downloaded (**Figure 1**).

Figure 1 - Set API access credentials

### Step Two:

[Download](#) and Install Google Cloud SDK (**Figure 2**).

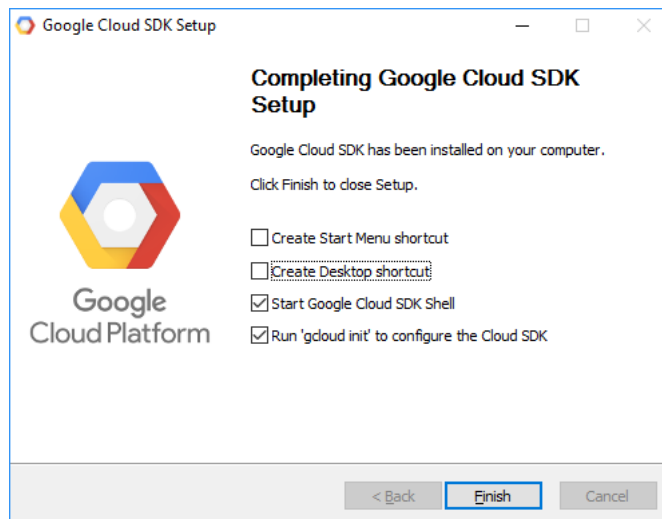

Figure 2 - Google Cloud SDK has been installed

It is necessary to **reboot your machine** after installation.

### Step Three:

Please download the example projects from [here](#).

Run the C# IDE you use. For example Visual Studio.

Right click on one of the example projects and select 'Manage NuGet packages...' (**Figure 3**)

#### RECOMMENDED FOR YOU:

**SMS Gateway software**  
Ozeki brings you outstanding **SMS Gateway** technology. Use our **SMS Server** products on Windows, Linux, or Android

**C# SMS API**

Developers can use our **C# SMS API** to send SMS from C#.Net. The C# SMS API comes with full source code

#### PHP SMS API

The ozeki **PHP SMS gateway** software can be used to send SMS from PHP and to receive SMS using PHP on your website

#### SMPP SMS Gateway

SMS service providers use our **SMPP gateway** solution, that offers a high performance **SMPP server** and **SMPP client** gateway with amazing routing capabilities

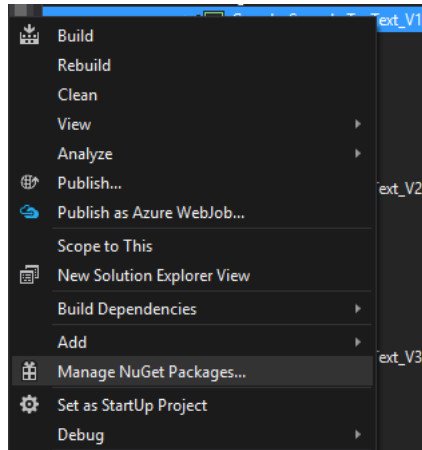

Figure 3 - Right click on one of the example projects to 'Manage NuGet packages...'

By clicking 'Restore' (**Figure 4**), Visual Studio automatically restores NuGet packages.

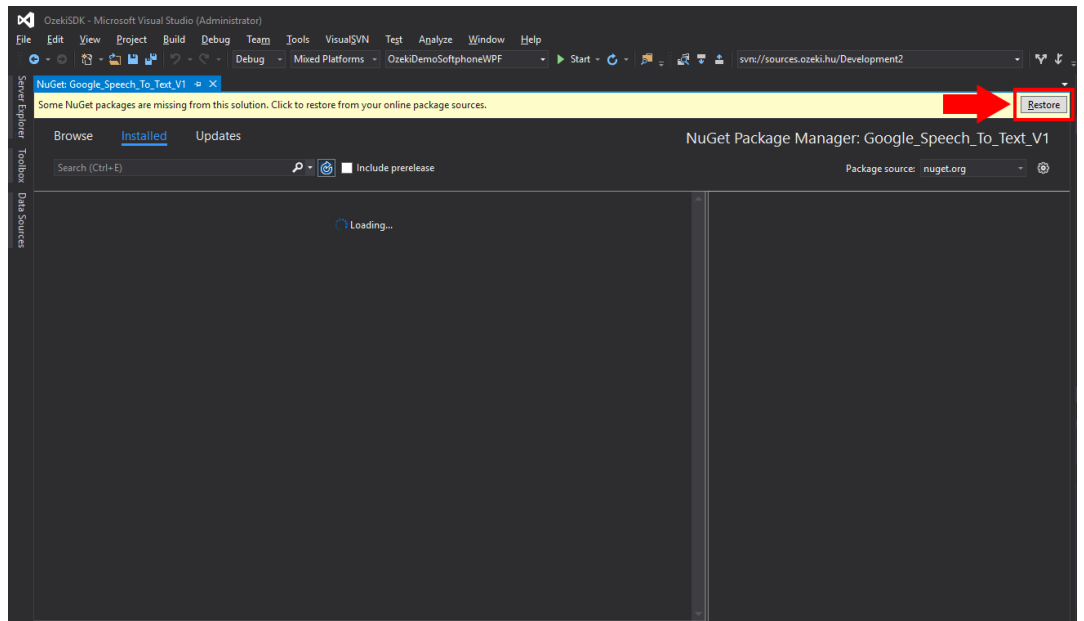

Figure 4 - Restoring NuGet packages

On **Figure 5** you can see the automatically restored NuGet packages.

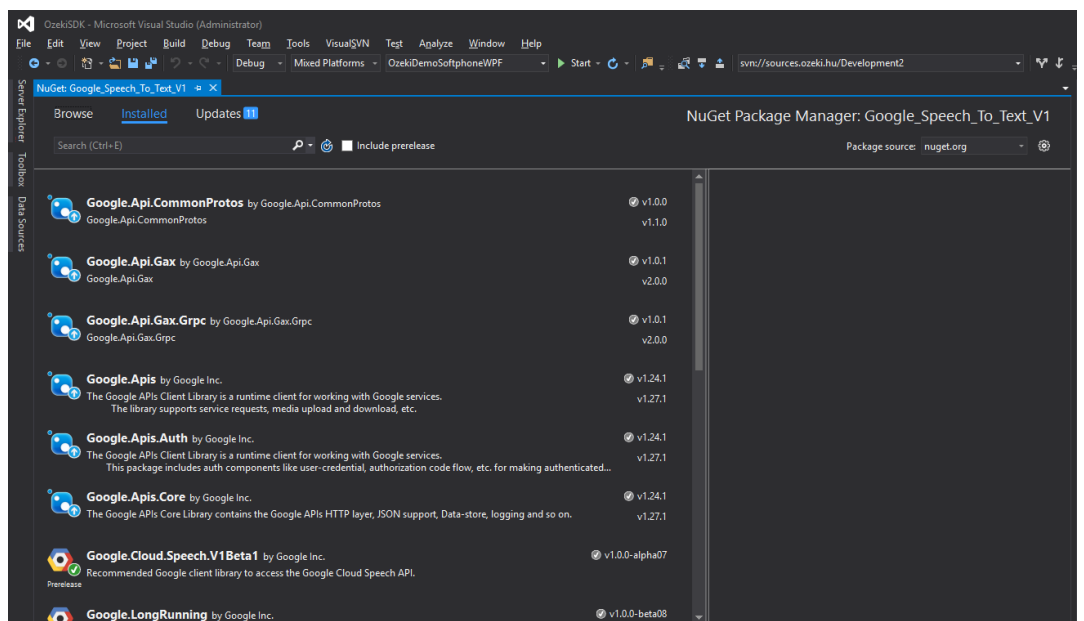

Figure 5 - NuGet packages have been restored

Do not forget to set the project as startup project (**Figure 6**).

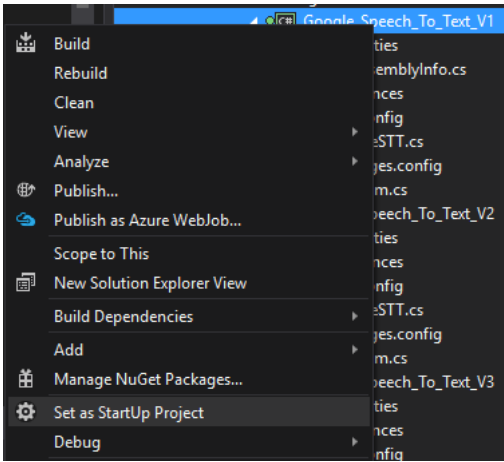

Figure 6 - Right click on the previously selected example project to 'Set as StartUp Project'

After finishing these steps you must be eager to test the project by pressing 'F5'.
